Security Advisory

## Problem

Wibu has addressed some vulnerabilities in the updated version of CodeMeter Runtime. These vulnerabilities include [CVE-2023-24540](#), [CVE-2023-38545](#), and [CVE-2023-3935](#).

Mastercam 2024 and the Licensing Utilities installations use the CodeMeter Runtime 7.60, which contain the above-mentioned vulnerabilities.

## Cause

Mastercam 2024 and the Licensing Utilities installations use the CodeMeter Runtime 7.60, which contain the above-mentioned vulnerabilities.

## Solution

All users and servers running Mastercam 2024 and earlier versions should download and install the latest version of CodeMeter 7.60d from [here](#).

For more information regarding the vulnerabilities addressed in the latest release of CodeMeter, please visit Wibu's Security Advisory [page](#).
